always of so many head of cuttle, but have metalic deposits with it frequently of so many dogs, which are to the amount of \$18,000,003—a to form the nucleus of a dog farm, treasure more prodigious than these being reared for the sake of the thick fur with which the dogs in these time thought could be possibly actime thought could be possibly actime thought could be possibly actime. bitterly-cold regions are so excelently cumulated. The notes issued by the endowed, as indeed they would need to bank were supposed to be, and in the bank were supposed to be, and in the be, seeing that in midwinter the thermometer (Fahrenheit) sometimes falls to 25 deg, below zero, i. e., 57 deg, of frost. This business is as systematically carried on as is that of sheep farming in Australasia, the rate of reproduction being estimated at ten reproduction ten reproduction to the specie or metalic money deposition and Poison the Barking Dog on the Barking Dog on the Barking Dog on the specie or metalic money deposition and Poison the Barking Dog on the Barking geometrical ratio, it that the bride who receives a dower of a dozen of these very large long-haired dogs is well started in life. But of course the ma-jority of these fine animals are not stined to survive their first year, as they are full grown when about eight ment of the Amsterdam corporation, months old, and their furs attain perfection in winter, so that only those required for breeding are allowed to see the spring. All over the northern see the spring. All over the northern managers of the can all the part of these vast Mongolian and Manchurian territories these dog farms are seattered, and there are thousands in the interest of the Amsterdam municipal the interest of th which a few hundred dogs are annually reared for the market, while erely raise e.ough to supply robes and mats for home use. There are a good many cases in which one can scarcely afford to think of antecedents, and certainly this slaughter of perhaps the handsomest race of dogs under which the Bank of Amsterdam in the world for the sake of their coats is peculiarly unpleasant. - Blackwood's

Some of the Conditions Which Render Their Experiation Unprofitable. The impression is no doubt general that the tropics are especially favorable to fruit culture. Travelers describe in glowing colors the appearance of orange-trees bearing at one and the same time biossoms, green settlers in London, who drives out for the grant transfer or the same time biossoms, green settlers in London, who drives out for the grant transfer or the same time biossoms. fruit and ripe. Such a condition of things is convenient and desirable in cases where the fruit is raised for home consumption, but it is a serious of Netherland finance drawback to exportation. A fixed sterdam received a remarkable consenson for harvesting is necessary if firmation in 1672. In this year Louis the aim of the culturist be supplying a foreign market. In the case of fruit which has to be gathered in clusters, like the grape, this habit of ripening den war on the Dutch. It was perindifferently at any time of year is a

but the bunches never ripen thoroughtain berries of every age, from the smallest green to the oldest purple. For the making of wine this makes necessary a sorting of the berries, which involves a great deal of labor and trouble, as well as a waste of fruit. Again, in many parts of tropical America, the hot season is also the rainy beaks out. The Datch were carried. ica, the hot season is also the rainy broke out. The Dutch were panicseason. The wet and heat together struck at the calamity which came on lead to rapid decay as the fruit apthem, and the political enemies of the lend to rapid decay as the fruit approaches maturity. To protect itself from this danger, the skin of the grape murdering the two statesmen—a crime murdering the crime murdering the control of the properties of

would with his head and shoulders bent low. He suddenly fell, became unconso ous and soon died.

What was the cause of his death?

Apoplexy—the physicians would say apoplexy of the brain. In persons of good health, the coats

of the arteries throughout the entire body are tough and clastic. In unhealthy persons, particularly those whose kidneys are diseased, the walls of the arteries undergo "degenera-tion"—due to the action of the im-parities in the blood which the kidparities in the blood which the kin-novs have been unable to remove.

In these cases, when the action of the heart is intensified by vigorous exercise or excitement, the pressure upon some artery becomes to strong for it in its weakened state—x rup-

BANK OF AMSTERDAM.

esting Sketch of a Famous Monetar Far back is the middle ages, says

the coins of all nations, and give war-rants to those persons who deposited such coins, which warrants should cir-such coins, which warrants should circulate from hand to hand, just as bank culate from hand to hand, just as bank notes do now. Three centuries after the Bank of Venice was founded, a similar Life!"

Insect. exclaiming:

"Ah! you Pest, but I'll have your Life!" institution was established at Genoa. The Peculiar Wedding Portion of Wealthy on a somewhat similar basis. In 1639, Mongolian Brides. Mongolian Bride. the year of the truce, the bank of In Manchuria and Mongolia a young Amsterdam was founded, and before woman's wedding portion consists not the end of the century was known to

the bank charged a small sum on every account which was opened with it, a small sum for negotiating bills and transferring balances, besides a profit which they derived from their own subscribed capital and their customers' money at call.

Croaking of a Frog. Out of Patience at last with the Interruption, he sprang up and demanded:

"In Heaven's name, why do you keep that Noise going?"

"It's the only Noise I can make," was the Humble Reals.

money at call.

The bank was under the management of the Amsterdam corporation, ure annually, and made outh that it was of the full amount at which the managers of the bank affirmed it to be. pality that they could be more safely trusted with the control of the institutotion than any State official could be. When nearly a century afterward the project of starting a great central bank in England was entertained, it was was managed should be the model of a bank to be established in London. In the end, and fortunately so, other counsels prevailed, for in the seventeenth century London had not been so completely educated in the principles of commercial honor as to make the Amsterdam extheir religion, brought over with them the intelligence, sagsetty and integrity

The reputation of the Bank of Am-XIV., having secured by heavy brides the complicity and assistance of Charles II. of England, declared sud-Charles II. of England, declared sudden was on the Dutch. It was perhaps the most inconvenient one.

It is said by observers that in Brazil and in tropical Africa graps look well, but the bunches never ripen thoroughly. In fact, the same cluster will contain berries of every age, from the smallest green to the oldest purple. For the making of wine this makes necessary a sorting of the berries, which involves a great deal of labor.

the merchants were satisfied, and the reputation of the bank became higher and higher.

many years before had occurred in the Stadthouse. The panic was allayed,

A Journalistic Santa Claus. It was long ago said of Mr. George W. Childs, the publisher of the Public Ledger of Philadelphia, that he was the two Cheeryble brothers rolled Ledger of Philadelphia, that he was "the two Cheeryble brothers rolled into one," but he probably might be more accurately described as the Santa Claus of the newspaper world. On last consider the find of the waste matter in the pressure of the Ledger nearly forty thousand dolars. Whether they fall in the complete removal of the waste matter in the considered the large as the largest poil by are as large as the largest poil by the sent poil of the waste matter in the considered the largest poil by the salaries and wages paid by Mr. Childs, it is said, distributed among the editors, reports to the anti-slavery agitation which has produced the blockade of the East African coast, and is the talk large. When it is considered that the salaries and wages paid by Mr. Childs, it is said, distributed among the editors, reports to the anti-slavery agitation which has produced the blockade of the East African coast, and is the talk of every capital in Europe.

The Need of Moisture.

As to the keeping of a basin of hot water on the stove much variety of opinion has been given. Theoretically it is claimed that it does not affect the degree of moisture. We believe, however, that Prof. Brackett, of Princeton has best stated the reasons that justify its use, as well as the approximate in amount required. "If one pound of air at 32 deg. F. were saturated with moisture, it would contain .00379 pounds of water. If, now, the whole

points of water. If, now, the whole were heated to 42 deg. F., it would no longer be saturated, since at this temperature a pound of air would be capable of holding .00561 pounds. Merely heating the pound of air together with the vapor contained in it has changed its hygrometric state from complete saturation to one in which only sixty-eight per cent. is saturated." This inclines the air in certain states and relations to call for more moistand relations to call for more moisture, which, furnished from the vapor
of water near at hand, will not so much
be drawn from ourselves.—Boston

Many of the recognized authorities in civil as well as military circles say, "The malarial disease is most danger out in that the kidneys are must liable to break down." Such men as Dicosta, Atkinson and Pep er. professors in our leading medical schools, and Sudaton, Surgeon Gen. in the Russian army, Woodward, Surg Gen. in our American army, speak of malaria as a direct complication of chronic Bright's disease. The kidneys must be kept free from disease and the poisonous germs of malaria; neys must be kept free from disease and the poisonous germs of maiaria; they must act nomally in cleansing the blood, for 65 gallons of it passesthrough them every hour. People in maiarial localities recover from both the cause and effect or malaria by using Warner a Safe Cure. Every person, in the spring or fall, who has either kidney disease or malaria, should use Warner's Safe Cure as a precautionary measure.

Indian Bones.

Mr. Henry B ankenship brought to our office Tuesday a box of bones, teeth, mica, &c., that his son H. F. tech, mica, &c., that his son H. F., had plowed up in an indian mound located in his garden, and which had searly been leveled by frequent plowing. The bones which evidently belonged to an Indian brave were in good preservation, though they had lain there at the lowest calculationally was a The teeth were sound a. 100 years. The teeth were sound a-a dollar and such a set as would be in early to the average man of this generation. Many curious stones not belonging to the locality covered the nones. There are five other mound in the place yet to be explored -In
